

Pictured is Compass Architecture's tentative concept for the new building if the April 4th bond issue passes. This building will run north and south connecting the current 5th/6th grade annex to the main elementary school building. Included are 8 new classrooms for 5th-8th grades, two computer labs, and a Science lab which makes up 85% of the \$10,150,000 being asked for with the bond vote. Replacing the track and making roof repairs account for the remaining 15% being sought. The tax increase would be 35% if the bond issue is approved by voters.
